Fire Connections Home Learning

Go home and connect with your friends, family, and other trusted community members. Record your ideas using words and/or pictures.

1. In what ways has our community been directly or indirectly impacted by fire?
2. How could a fire in another community (for example, a wildfire or zombie fire) impact my community directly or indirectly?
3. Throughout this unit, we will be learning ways people and systems are addressing fires. Learning about fires and their impact on communities and ecosystems can also bring up strong feelings. Take a few moments to reflect on your thinking about fires. Consider what feelings come to mind for you. Describe or explain your reflection.
